BASINTAGE RS

RS-XXXX + AT-1820

The BASINTAGE RS collection is a revolutionary reactive colour system for wood that exists out of 2 component ecological water-based stains (with an activator) that give an antique appearance to the wood. Thanks to their lightfast high-end hues, these stains are suitable for all types of wood.

Attention: always use the advanced technology of the BASIN finishing products to ensure the non yellowing appearance of the wood.

smoked grey

RS-2005
classic brown

RS-2006
vintage grey

RS-2007
antique brown

RS-2009
natural brown

RS-2010
black

ADVANTAGES

100 % ecological

Water-based and with colour dyes that do not contain any heavy metals.

Revolutionary

One can obtain an aged look in only one (stain) layer, while the traditional antique staining method requires multiple applications.

Stability under light exposure

The shades are light-stable provided that they are covered with 3 coats of the NO VISIBLE, PROTECT, ... BASIN varnish brand to protect them against the yellowing of the wood.

Washable aged effect

After application with the BASINTAGE RS stain and drying, one can wash the wood with water and obtain a washed effect that gives another type of "aged" effect.

Unlimited choice of wood species

One can colour wood species like American oak, softwood, light-coloured exotic wood etc.

Stable and reproducible stains

The aged parquet manufacturing business searches for stable antique finishes in time for large productions and reproducible products for their resellers.

Oiled finish

The BASINTAGE RS stains can be treated with WOOD OIL PU-XXXX by BASIN.
